

SERVICE FOOTBRIDGE

- Provides a large working surface on the façade
- Adapts to different height levels
- Its wooden floor enables it to adapt to the slabs edge shape

The balustrade can be withdrawn to ease the exit of tunnels or tables. The support point of the footbridge being mobile, it can adapt the footbridge to different height levels.

The footbridge also exists with a fix support point, in which case the footbridge is designed for a specific height level.

The footbridge must be dismantled for transport.

CHARACTERISTICS:

Height level: 2,45m mini to 3,33m maxi

Bulk all excluded: 5,60m x 3,40m

Work surface: 3,00m x 3,40m.

1/1

Telescopic leg

Footbridge with vertical balustrade
